Education

Universitat Politècnica de Catalunya (UPC) - FIB

M.D. IN INNOVATION AND RESEARCH IN INFORMATICS

- Specialization in *Data Science*.

Barcelona, Spain

2018 -

Universitat Politècnica de Catalunya (UPC) - FIB

B.S. IN COMPUTER SCIENCE

- Coursed via *Centre de Formació Interdisciplinària Superior* (CFIS).
- Final project: "Efficient Learning using Kernelized Associative Memories" (A with honors).

Barcelona, Spain

2013 - 2017

Universitat Politècnica de Catalunya (UPC) - ETSETB

B.S. IN TELECOMMUNICATIONS ENGINEERING

- Coursed via *Centre de Formació Interdisciplinària Superior* (CFIS).

Barcelona, Spain

2012 - 2017

Work

Arcvi

DATA SCIENTIST

- Developed predictive and explanatory models of web-visitors behaviour like click probability and subscription look-alike.
- Implemented a prototype of an assignment adaptive optimization system with different constraints and heuristics.

Barcelona, Spain

Mar. 2017 - Jun. 2017

Honors

- 2018 **Novartis Datathon**, Second place. Awarded by Novartis & Eurecat.
- 2018 **BCN AQ Datathon**, Creativity prize. Awarded by Barcelona Supercomputing Center & BCNAnalytics.
- 2016 **2nd BCN Datathon**, Best prediction model. Awarded by SocialPoint & BCNAnalytics.
- 2013 **ETSETB**, Second best initial year academic record prize. Awarded by everis.
- 2013 **CFIS**, Admission to a UPC center of excellence that offers interdisciplinary studies combining 2 bach. degrees.

Projects

MirrorAid

TEAM LEADER

- Software tool to improve the therapy sessions of peripheral facial paralysis-affected patients.
- Organized and developed the real-time video processing and face detection components using C++ *dlib* library.
- Project within the *Advanced Engineering Project* course at ETSETB collaborating with the Bellvitge Biomedical Research Institute.

Sep. 2015 - Jan. 2016

AmpWorks

TEAM LEADER

- Toolbox to characterize/simulate power amplifiers and improve digitally sound files using an equalizer.
- Organized the project and developed the power amplifier characterization component using MATLAB.
- Project within the *Basic Engineering Project* course at ETSETB.

Sep. 2014 - Jan. 2015

Skills

Tech Algorithms, Deep Learning, Distributed Computing, Game Theory, Machine Learning and Optimization
Prog C++, Go, Julia, Python, R and SQL
Lang Native: Catalan and Spanish · Professional: English
